

Quality Policy

It is the policy of Applied Physical Electronics, L.C. (APELC) to provide our customers with the highest possible quality and value in our products and services.

We are committed to meeting all customer requirements as well as all statutory and regulatory requirements, and to continually improving the effectiveness of our Quality System processes. To achieve this, we have created a documented Quality System to control our processes, establish and review objectives, and provide a forum for improvement. Our goal is to provide innovative ideas, technologies, and services that exceed the requirements and expectations of our customers.

Every APELC employee is responsible for ensuring that his or her daily activities focus on providing this level of excellence.

This statement represents our commitment and objectives regarding quality.

Quality Policy

The goal of all our endeavors at APELC is to meet the demands and expectations of our customers for Pulsed Power-related systems and components. We produce these products for pulsed power, and high voltage-related companies and organizations, such as the Department of Defense and the Department of Energy, while complying with all customer and regulatory requirements.

To insure that our products are of the highest quality possible we employ a quality management system that includes the control of all aspects of the manufacturing process including raw material procurement.

While our management team takes the lead in our efforts and is accountable for our results, we aspire to gain the understanding and involvement of everyone at APELC and are committed to providing adequate resources and the level of training and awareness necessary for every person here to contribute to achieving our goals.

We operate APELC with a commitment to continuous improvement including the regular management review and documentation of our quality management system and quality objectives. This includes our policies, audit findings, corrective actions and customer complaints.
